

Flexible packaging
solutions from the pile

Manufacturer and idea provider

As a full-service provider of constructive packaging systems with 145 years of experience we rely on competent consultation and innovative problem solution.

Our credo: Offer more than usual; work more carefully than necessary; and provide more attentive consultation than expected. With a tight distribution network and excellent service we are always close to the customer.

Our affiliation to Peters Beteiligungsgesellschaft, a family-run holding, provides us with a strong position with economic and strategic advantages.

We are a member of the German Corrugated Cardboard Quality-Assurance Body (Gütegemeinschaft Wellpappe) and comply with the strict quality and technical specifications of the RAL Quality Assurance Body. In addition, we have been certified in conformity with the German standard DIN EN ISO 9001 since 1994.

We support recycling of used corrugated cardboard within RESY system, and if we do not process recycled paper, it is FSC® certified or FSC controlled (License Code FSC®-C123421).

Use in your production process

When standard solutions reach their limits, our intelligent VaryBoard® system packaging makes its grand appearance: Small series, frequently changing products, unusual dimensions - VaryBoard® offers the right packaging for every demand and for every branch.

One for everything: Our extremely flexible and versatile VaryBoard® system packaging integrates seamlessly into your production process. As endless corrugated cardboard in zigzag stacking, VaryBoard® can be stored in space-saving way, and is always available.

In advance, we clarify with you the packaging needs and tailor VaryBoard® precisely to your requirements. A special forte of VaryBoard® is its suitability when products have to be packed with unusual dimensions. Apart from manual use, automatic packaging is possible as well here.

Endless possibilities

With VaryBoard® you receive - even for small series - a custom-fit, protecting and reliable packaging at favourable conditions. VaryBoard® comes to you on pallets and can be cut to every product length. In this way you minimize your administrative expenses and at the same time you increase your supply security

Directly on the production plant, VaryBoard® can be printed in two colours in excellent quality, rendering for example advice on storage and transport or instructions for use. Or, you provide your company appearance with a special notes with graphically attractive information. Endless motifs in flexo direct print are possible by sleeve technology as well. Moreover, VaryBoard® can be printed all-over as well.

The advantages at a glance

Versatility of kinds and applications

Manual or automated packaging

2-colour print according to your colour specifications

Always ready, thus more delivery reliability

Flexible and stable, and space-saving in addition

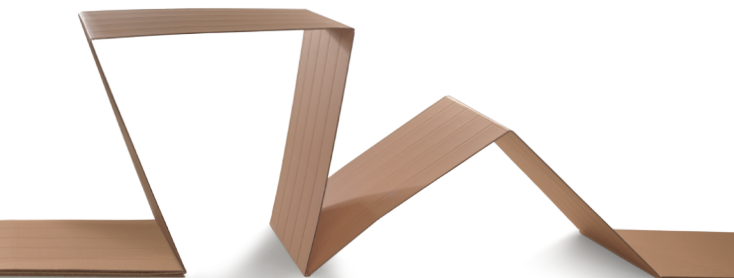

Lower transport costs, less waste

In a non-committal consultation appointment we will be pleased to clarify with you how you can apply VaryBoard® ideally in your production process.
